## MAP AND TERRAIN

### 竜王山西麓(The West Side of Mt.Ryuoh)

Scale/Contour: 1:(about)10000/5m

Mapper: Kyoto Univ. & Kyoto Women's Univ. OLC with Mr. Marian Cotîrtă

Terrain Introduction:

*Very technically framed terrain, but with good airworthiness due to prominent ridges. The land allows for a very good allergability and the areas differ quite a bit in small surfaces. The rocky areas bring a positive touch to technicality without disturbing the run. (by Mr. Marian Cotîrtă)*

# THE MASCOT CHARACTER

They say that in a pond somewhere in The Mystic Forest Hirano lives a legendary monster which has the ability to purify water. One day, a rock which had used to be IWACCHO happened to be fallen into the pond. At the moment the rock was breathed new life into again by the magical power of the sacred water and became IWAGGYO, a fish-looking rocky fairy. He seems not to be able to

remember anything while he had been IWACCHO. Some people say that IWAGGYO is similar to someone in 38th members.
